# Continuum of Care Committee

Thursday, March 14, 2013  
3:00pm-4:00pm

Meeting Location  
SB County of Public Health  
172 W. 3<sup>rd</sup> St. , 6<sup>th</sup> Floor  
San Bernardino, CA 92415  
(909) 693-0750

Teleconference Site  
Desert AIDS Project  
1695 North Sunrise Way  
Palm Springs, CA 92262-3702  
(760) 323-2118

*These facilities are in full compliance with the Americans with Disabilities Act of 1992.*

## Agenda

<sup>1</sup> Public Comments: Any member of the public may address this meeting on items of interest that relate to the Ryan White CARE Act by completing a speaker slip to indicate their interest in addressing the Planning Council. A three-minute limitation will normally apply to each member of the public who wishes to comment, unless waived by the Chair.

<sup>2</sup> The agenda item may consist of a discussion and a vote. Public comments can be made prior to each Planning Council vote.

\* Members must be present at both roll calls to receive credit for meeting attendance.

\*\* Attachment was not available at time of printing, but will be available at the meeting.

Requests for special accommodations (e.g., language translation) must be received 72 hours prior to the date of the meeting. Contact PC Support at (909) 693-0750

All meetings of the Planning Council and its committees are open to interested parties from the general public. Notices are posted in compliance with the California Brown Act. Information regarding Planning Council meetings, and/or minutes of meetings are public records and are available upon request from the Planning Council Support Staff by calling (909) 693-0750 or by visiting the website <http://www.iehpc.org>.

Servicios en Español: Notificación para servicios de intérprete deben de someterse setenta y dos horas de anticipo. Por favor llame (909) 693-0750.

- (f) Monitoring to ensure that the Council's membership meets legislative requirements and HRSA standards, is representative of required membership categories, reflective of the epidemic in the TGA, and includes at least one-third (1/3) unaffiliated consumers of Part A services.

- (2) Composition: At least one (1) member who is a PLWH, and at least one (1) other member who is a person of color.

**f. Empowerment Committee**

- (1) The responsibilities of the Empowerment Committee shall include:

- (a) Fostering awareness of HIV/AIDS and the role/mission of the Council in the communities of the TGA, and support for programs assisting PLWH,
- (b) Serving as a sounding board and line of communication between the TGA and populations that are historically and newly identified as being underserved,
- (c) Promoting consumer education about the services available through Part A,
- (d) Making recommendations to the Council to achieve equitable delivery of high quality, culturally competent services to all eligible consumers, and to improve outreach and services to underserved populations,
- (e) Making recommendations to the TGA on how to increase its effectiveness at identifying and bringing into care persons who are aware that they are HIV infected but are not in care,
- (f) Gathering information about and creating awareness of services that are part of the TGA's continuum of care and are available at low or no cost to consumers, but are funded by sources other than Part A, and
- (g) Supporting the recruitment of qualified members for the Council, and facilitating participation of consumers at all levels.

- (2) Composition: The Empowerment Committee shall consist of no more than nine Council members and an unlimited number of non-Council members. Special efforts shall be made to recruit PLWH, including unaffiliated Part A consumers, as members. The Chair must be a member of the Council.

**g. Continuum of Care Committee**

08/29/2011  
09/27/2011

(1) Responsibilities: The responsibilities of the Continuum of Care Committee (COC) shall include:

- (a) Guiding, coordinating, facilitating, and overseeing the development and strengthening of the TGA's continuum of care,
- (b) Taking the lead for the Council in the evaluation of Council products and actions including:
  - i. Monitoring and evaluating progress on the Comprehensive HIV Services Plan goals and determining what impact services are having on client health outcomes,
  - ii. Examining the cost-effectiveness of the services delivered, using cost and utilization data provided for each service category by the RWP as well as outcomes data,
  - iii. Reviewing service category expenditures and program performance and comparing them with Council goals and objectives,
  - iv. Assessing aggregate performance of services,
  - v. Providing information (input) for the development of the Comprehensive Plan, and
- (c) Recognizing that clinical quality management (QM) is primarily a RWP responsibility, receiving and using clinical quality management data on a service category level, and working with the RWP to support and learn from the TGA's clinical QM activities,
- (d) Ensuring coordination in the provision of services with non-Part A programs, including programs for HIV prevention and for the prevention and treatment of substance abuse, and
- (e) Implementing special projects related to standards and evaluation activities.

(2) Composition: The Committee shall ensure diverse participation, including PLWH and other non-providers as well as providers.

#### **h. Standards Committee**

(1) Responsibilities: The responsibilities of the Standards Committee shall include:

- (a) Developing and updating service category definitions and standards of care for each service category. Specific activities include:
  - i. Developing and revising, as needed, the Standards of Care for funded service categories, and recommending Client

## B. Current Continuum of Care

The TGA's *Continuum of HIV Prevention and Care* is designed to address the needs of PLWHA across all life stages, from those unaware of his/her HIV status, through HIV counseling and testing, early intervention and linkage to care, to retention in care and treatment adherence. Outpatient/ambulatory medical care is the cornerstone of the TGA's care model, which is grounded in the *Chronic Care Model*. With its growing population of PLWHA of color, the TGA adheres to the Office of Minority Health's *Standards on Culturally and Linguistically Appropriate Care* as the starting point for mitigating cultural and linguistic barriers to care. Part A and MAI-funded EIS support a focused effort to bring PLWHA who are out of care and newly diagnosed HIV positive individuals into care. To support access and retention in care, the TGA funds a wide range of Ryan White core and support services, including medical and non-medical case management, to help PLWHA navigate a complex care system. The TGA funds mental health, outpatient substance abuse, medical transportation, food, and housing services to mitigate key barriers. (See Table 15 for a complete listing of Ryan White Part A and MAI prioritized and funded services for FY 12-13.)

All Part A and MAI funded services are part of the TGA's comprehensive continuum of care. Other services along that continuum are available through other resources including: Part C-funded early intervention services, home health care (Medi-Cal; Medicare), hospice (Medi-Cal; Medicare), rehabilitation services (Medi-Cal; Medicare), legal services (legal aid clinics), and much more. RW non-medical and medical case managers help PLWHA navigate these resources. The TGA's planned services are intended to help fill the gap where other services do not exist or are insufficient to meet current needs.

With its *High-Impact Approach to HIV Prevention* initiative, the Centers for Disease Control and Prevention (CDC) places an increased emphasis on identifying new HIV positive individuals and linking them to care through HIV counseling and testing and preventing transmission of HIV by targeting HIV prevention programs to HIV positive individuals. The intent of the CDC's *Prevention with HIV-positives* efforts is to stem the epidemic at its source. Through partner counseling and referral services, the CDC hopes to encourage known partners of HIV positive individuals to seek HIV antibody testing. Finally, the CDC also recognizes that HIV positive individuals who are engaged in primary medical care are more likely to practice safer sexual and/or needle-sharing behaviors than those who are not linked to care, thereby reducing their risk of transmitting HIV to others. With this paradigm shift within the CDC, the gap between HIV prevention and care disappears as HIV prevention and care become complementary components of the comprehensive continuum of care.

**Integrated Model of HIV Prevention & Care:** The Continuum of Care Committee (CCC) has among its responsibilities cited in PC Bylaws the "Guiding, coordinating, facilitating, and

overseeing the development and strengthening of the TGA's continuum of care. Prior to the July 2011 PSRA Summit, a continuum of care from the Minnesota's *Integrated Model of HIV Prevention and Care* was adopted by the PC.

The Continuum of Prevention and Care is a model for thinking comprehensively about HIV services for the general community, at-risk individuals and PLWHA across populations and across the various states of HIV disease. The model attempts to: 1) identify the array of prevention services needed in order to increase awareness of HIV, and support the general population, at-risk individuals, and PLWHA in maintaining safe behaviors; and 2) identify the full battery of care services that need to be available throughout the TGA to support PLWHA to attain their highest quality of life.

The Continuum of Prevention and Care is a planning tool for the Planning Council and RW Program in developing an "ideal" system of HIV prevention and care in the TGA. As part of that work, the Continuum of Prevention and Care is one of many pieces of information that is used by the PC at their annual PSRA Summit.

The Continuum of Prevention and Care includes all HIV-specific prevention and care services, including those that are not currently funded through the RW, state care or prevention dollars, or CDC prevention funds, or are not eligible for funding through those sources. Such services are essential to the care and support of PLWHA, and to supporting prevention efforts in the TGA. It is important to recognize that the RW, state dollars, and CDC funds represent only several possible sources of funding for care and prevention services. It is essential that planning for RW, state, and CDC funding is done in consideration of and in coordination with each other and with services funded through other mechanisms. These services can help identify opportunities for collaboration with service organizations outside of the current HIV system of care and help the Planning Council and RW Program avoid a duplication of effort in funding decisions.

Following the review of needs assessment information, client utilization data, unmet need and gap analyses at the PSRA Summit, the planning council's Continuum of Care Committee (CCC) identified the need to enhance the comprehensiveness of the continuum. One revision sought was to include three categories of services by broad funding source: 1) TGA-funded RW services; 2) services eligible for RW funding but not provided; and 3) services provided locally in public or private sectors.

This Continuum of Prevention and Care model looks at populations, and within the population of PLWHA, at the stages of HIV disease. It is intended to identify all essential and support services that might be needed for each population and during the various states of HIV disease.

The Continuum of Care Committee of the Planning Council worked to develop a set of essential services that should be available to all persons living with HIV in the TGA. This set of essential services is not limited by the resources directly available to the Planning Council but includes a set of services and strategies to link services that are currently in place.

The health, well-being and quality of life of all those residing in the TGA, and particularly PLWHA, are directly affected by the continuum of prevention and care available to them. While every individual may not need all the services identified in the continuum, every effort must be made to ensure that these services are available when needed.

**Stages of Life Framework:** The TGA's Continuum of Prevention and Care Chart accompanied by a glossary of terms used (Appendix C) is based on seven stages of life: general community; at-risk individuals; PLWHA unaware population; PLWHA recently diagnosed; PLWHA stable illness; PLWHA progressive illness; and PLWHA end of life (Table 14).

For each stage of life, CCC looked at populations and outcomes, general access services, essential services and additional services, (e.g., training for providers, mental health facilities). Within the populations and outcomes category for each stage, defining characteristics of individuals and multiple short term, intermediate, and long-term goals for them were proposed.

**Service Categories:** The Continuum of Prevention and Care model organizes services into three categories. Clearly, the general community, at-risk individuals and PLWH/A struggle with an array of needs, many times related to issues beyond HIV; however, the model focuses on service needs specific to HIV infection that are likely to be needed. The three service categories are as follows:

#### **A. Essential Access Services**

Essential access services help people obtain access to HIV care, support and prevention services. Because some people would never receive essential care or prevention services or HIV additional services without the assistance provided through essential access services, this model assumes that access services are essential services for people who otherwise experience barriers to care.

Essential access services allow the general population, at-risk individuals and PLWHA to address informational, geographic, financial, social and other barriers to accessing medical care, prevention, and support services. These include outreach, counseling and testing, case management, care advocacy, discharge planning, interpretation/translation, health insurance, housing access and support, transportation, benefits counseling, information and referral, and child care.

### B. Essential Prevention Services

Essential care and prevention services are those that are considered services necessary to address prevention and care needs. The model assumes that essential prevention services should be available to the general community, at-risk individuals and PLWHA across the TGA. The model also assumes that *at a minimum*, all persons living with HIV need the essential care services in order to receive adequate HIV care.

Essential prevention services address the basic HIV prevention needs of each population throughout the continuum. These services include, but are not limited to community awareness, comprehensive sexual education, sexual health promotion, prevention case management, partner counseling and referral services, health education and risk reduction, Syringe Exchange Program, substance use services, case management, and community mental health services. It is understood that the main focus of these efforts will coincide with the CDC's new *High-Impact* initiative to target high-risk communities and prevention with HIV-positive individuals.

### C. Essential Services

Essential services address the basic needs of PLWHA. These services include medical care, oral health services, prescription drug services, medically-based housing service, substance use services, mental health services, health education and risk reduction, emotional support, nutritional services, and support services for HIV affected individuals and caregivers.

### D. Additional Services

HIV additional services are ancillary or “wrap-around” in supporting care and prevention needs of PLWHA, and behavior change needs of the general population and at-risk individuals. The model assumes that these services are needed to provide full support to people. The number and types of secondary issues that an individual experiences will drive the array of HIV additional services that person needs to manage his or her illness and/or prevention efforts. These services include, but are not limited to, early intervention and outreach services, adult day care, alternative/complementary care, legal services, and funeral arrangements

Many types of HIV additional services are provided through state and local departments of social services, health, employment, development and rehabilitation, mental health, and regional centers for person with developmental disabilities. Other services, due to their particular nature, are provided by a variety of organizations, including community-based AIDS service organizations, health professional training centers, and volunteers.

The CCC transmitted the revised Continuum of Prevention and Care to the Planning Committee for inclusion in the *2012 Comprehensive HIV Services Plan*. Slide presentations were made to the Planning Committee and the Planning Council in March 2012. During the revision process it became increasingly clear that greater collaboration and public/private partnerships will be

necessary to ensure the various services identified in the Continuum of Prevention and Care will be available and accessible. The Riverside/San Bernardino, CA TGA is projected to continue to be economically challenged for the life of this comprehensive plan. The strategies, goals and objectives and activities presented in Section Three reflect this recognition.

**Table 14 - Continuum of Prevention And Care Chart** (See Appendix C for a glossary of terms used below)

| <b>GENERAL COMMUNITY</b>   |  |                                  |
|--|--|----------------------------------|
| <b>Populations and Outcomes</b>  |  |                                  |
| Defining Characteristics   | May not have information about HIV disease, risks, or transmission   |                                  |
|  | May have inaccurate information about HIV disease, risks, or transmission  |                                  |
|  | May have biases, phobias, and prejudices   |                                  |
|  | May not be interested in or care about HIV   |                                  |
|  | Influence resource allocation through involvement in the political process   |                                  |
|  | Provide volunteer resources in a variety of settings and systems   |                                  |
|  | Very diverse population  |                                  |
| Short Term Goals   | Increased knowledge of HIV disease, HIV transmission, HIV testing, epidemiology data and trends, sexual health, risk groups, perceived risk, and resources available |                                  |
| Intermediate Goals   | Increased access to services, education and information  |                                  |
|  | Increased awareness of how individuals can get involved in prevention/care   |                                  |
|  | Recognize impact of HIV on health care system  |                                  |
| Long Term Goals  | Reduce fear, stigma, discrimination, and internalized oppression in order to create a supportive environment for HIV prevention and for persons living with HIV      |                                  |
|  | Everyone is aware of their HIV risk and status   |                                  |
|  | Referral into prevention programs for high-at-risk individuals, initiation of care strategy for people who test positive (see Undiagnosed and Recently Diagnosed)    |                                  |
|  | Uninfected individuals remain uninfected   |                                  |
|  | Increased awareness of risk  |                                  |
|  | Informed and healthy sexual life   |                                  |
|  | Consistent use of safer sex, needle use and exchange practices   |                                  |
|  | Everyone takes responsibility for reducing HIV infections  |                                  |
| <i>All services delivered in a culturally and linguistically appropriate manner with culturally appropriate materials.</i> |  |                                  |
| <b>Essential Access Services</b>   |  |                                  |
| Access to Care   | Availability for Information and Referral  | Culturally Appropriate Materials |
|  | Interpretation/Translation   | Counseling, Testing and Referral |
|  | Community Awareness  |                                  |
|  | Screening and Treatment of STD's, Hepatitis A, B, and C  |                                  |

| <b>Essential Prevention Services</b>   |   |                                     |
|--|---|-------------------------------------|
| Service Needs  | Counseling, Testing and Referrals   | Comprehensive Sexual Edu. (K-12)    |
|  | Community Awareness   | Sexual Health Promotion             |
|  | Public Policy Advocacy  |                                     |
| <b>Additional Services</b>   |   |                                     |
| Additional Services  | Training for Providers  | Health Education & Risk Reduction   |
|  | Training for Physicians   | Housing Access and Support Services |
|  | Training for Volunteers   |                                     |
| <b>AT-RISK INDIVIDUALS</b>   |   |                                     |
| <b>Populations and Outcomes</b>  |   |                                     |
| Defining Characteristics   | Are not HIV infected, but engage in behaviors that present risk of HIV infection  |                                     |
|  | May have awareness of risk and experience denial, or are willing to take some degree of risk  |                                     |
|  | May be unaware of risk or risky behaviors   |                                     |
|  | May lack information and education on disease process and transmission  |                                     |
|  | May experience issues related to Mental Health, substance abuse, domestic abuse, homelessness, institutionalized racism, homophobia, or other co-factors  |                                     |
| Short Term Goals   | Increase knowledge among health care and social service providers and at-risk individuals   |                                     |
|  | Develop risk reduction/planning for at-risk individuals   |                                     |
|  | Connect at-risk individuals to prevention services, counseling and testing  |                                     |
| Intermediate Goals   | Increased knowledge about HIV risk & potential characteristics of HIV infection   |                                     |
|  | Increased access to HIV testing   |                                     |
| Long Term Goals  | Everyone is aware of their HIV risk and status  |                                     |
|  | Early detection of HIV infection. Referral into prevention programs for high-risk individuals(see At-Risk), and initiation Plan of Care for people who test positive (see Undiagnosed and Recently Diagnosed) |                                     |
|  | Uninfected individuals remain uninfected  |                                     |
|  | Informed and healthy sexual life  |                                     |
|  | Consistent use of safer sex, needle use and exchange practices  |                                     |
|  | Increased access to and utilization of services   |                                     |
| <i>All services delivered in a culturally and linguistically appropriate manner with culturally appropriate materials.</i> |   |                                     |
| <b>Essential Access Services</b>   |   |                                     |
| Access to Care   | Information and Referral  | Counseling, Testing and Referral    |
|  | Interpretation/Translation  | Child Care                          |
|  | Outreach  | Health Insurance                    |

|  |  |                            |
|--|--|----------------------------|

|  | Substance Use/Abuse Services   | Post Exposure Prophylaxis  |
|  | HIV Screening for Pregnant Women   | Case Management            |
|  | Screening and Treatment for STDs and Hepatitis A,B and C   |                            |
| <b>Additional Services</b>   |  |                            |
| Additional Services  | Domestic Abuse Services  | Housing Services           |
|  | Sexual Abuse Services  | Training for Providers     |
| <b>PLWH/A Unaware Population</b>   |  |                            |
| This is a subset of the general community and at-risk populations  |  |                            |
| <b>Populations and Outcomes</b>  |  |                            |
| Defining Characteristics   | HIV infection and status undiagnosed   |                            |
|  | May experience non-specific flu-like symptoms  |                            |
|  | May experience opportunistic infection   |                            |
|  | May experience sores or changes in the mouth   |                            |
|  | May experience no symptoms   |                            |
|  | May or may not seek Outpatient/Ambulatory Medical Care   |                            |
|  | No formal HIV care or plan of care may have awareness of risk, but experience denial, avoidance, and suspicion |                            |
|  | May be a time of strengthening in preparation for testing  |                            |
| Short Term Goals   | Increase knowledge among providers and undiagnosed individuals   |                            |
|  | Develop plans for risk reduction & coping capabilities for undiagnosed   |                            |
| Intermediate Goals   | Establish knowledge about HIV status & potential characteristics of HIV  |                            |
| Long Term Goals  | Early detection of HIV infection, initiation of plan of care & prevention outreach                             |                            |
|  | Informed and healthy sexual life   |                            |
|  | Consistent use of safer sex, needle use and exchange practices   |                            |
| <i>All services delivered in a culturally and linguistically appropriate manner with culturally appropriate materials.</i> |  |                            |
| <b>Essential Access Services</b>   |  |                            |
| Access to Care   | Health Insurance   | Outreach*                  |
|  | Community Awareness  | Interpretation/Translation |
|  | Information and Referral   | Child Care                 |
|  | Non-Traditional Setting  | Medical Transportation     |
|  | Community Based Organizations (e.g. Collaboration with Faith Based Organizations, Non Traditional Setting)     |                            |

| <b>Essential Prevention Services</b>  |  |                              |
|---|--|------------------------------|
| Service Needs   | Outpatient/Ambulatory Medical Care   | Sexual Health Promotion      |
|   | Training of Providers  | Training of Physicians       |
|   | Counseling, Testing and Referral*  | Resource Awareness           |
|   | Health Prevention  | Mental Health Services       |
|   | HIV Screening for Pregnant Women   | Substance Use/Abuse Services |
|   | Education & Risk Reduction   | Syringe Exchange Program     |
|   | Partner Counseling and Referral Services   | Case Management              |
|   | Screening and Treatment for STDs and Hepatitis A, B, C   |                              |
| <b>Additional Services</b>  |  |                              |
| Additional Services   | Housing Support & Access   |                              |
| Identified Points of Entry for this TGA may include, but are not limited to:  | Substance Abuse Treatment Outpatient and In Patient  |                              |
|   | Correctional facilities  |                              |
|   | Mental Health Treatment Facilities   |                              |
|   | Health Clinics and other community settings  |                              |
|   | Non Traditional Community Based Organizations  |                              |
| <b>PLWH/A Recently Diagnosed</b>  |  |                              |
| It is recognized that when a person is diagnosed, s/he will fall into one of the other states of HIV disease progression based on how healthy s/he is at the time of diagnosis. The services listed here are suggested as meeting the specific needs of a newly diagnosed person, but s/he may fall into another disease state and may need any of the services listed under that state |  |                              |
| <b>Populations and Outcomes</b>   |  |                              |
| Defining Characteristics  | HIV or AIDS infection has been diagnosed   |                              |
|   | Person is newly diagnosed or new to HIV/AIDS care  |                              |
|   | May experience no symptoms   |                              |
|   | No HIV/AIDS care strategy is in place  |                              |
|   | Can have characteristics of another HIV disease state  |                              |
|   | The individual has not integrated HIV into their life; e.g., emotional, medical and social aspects |                              |
|   | May have little knowledge about HIV/AIDS   |                              |
| Short Term Goals  | Secure short-term intervention and Outpatient/Ambulatory Medical Care*                             |                              |
|   | Establish ongoing medical and Oral Health Care*  |                              |
|   | Identify resources to pay for medical and Oral Health Care*  |                              |
|   | Establish professional and non-professional social and emotional supports                          |                              |
|   | Development of an individualized HIV risk reduction intervention plan                              |                              |
| Intermediate Goals  | Begin plan of care   |                              |
|   | Identify coping mechanisms; e.g., spiritual, emotional, risk reduction                             |                              |
| Long Term Goals   | Integration of HIV/AIDS into health care and daily living  |                              |
|   | Informed and healthy sexual life   |                              |
|   | Consistent use of safer sex and needle use practices and syringe exchange.                         |                              |

|  |   |                                     |
|--|---|-------------------------------------|
| <i>All services delivered in a culturally and linguistically appropriate manner with culturally appropriate materials.</i> |   |                                     |
| <b>Essential Access Services</b>   |   |                                     |
| Access to Care   | Health Insurance  | Discharge Planning                  |

|  | Support Services for Affected Individuals and Care Givers   |                                     |
|  | Prescription and over the counter Drugs including psychiatric medications   |                                     |
| <b>Additional Services</b>   |   |                                     |
| Additional Services  | Emergency Financial Assistance**  | Vocational Rehabilitation           |
|  | Prevention Training for Care Providers  |                                     |
|  | Clinical Trials-Entry Programs for Recently Incarcerated  |                                     |
|  | Legal Services** including Advanced Directives Counseling   |                                     |
| <b>PLWH/A Stable Illness</b>   |   |                                     |
| <b>Populations and Outcomes</b>  |   |                                     |
| Defining Characteristics   | HIV or AIDS diagnosis   |                                     |
|  | CD4 counts and viral load are stable  |                                     |
|  | Established Plan of care e.g., ART, complementary, no antivirals, monitoring of CD4 counts and viral loads are in place and is aware of disease process and treatment options |                                     |
|  | May experience common illnesses and/or treatment side effects   |                                     |
|  | May experience oral infections  |                                     |
|  | Impact of HIV/AIDS on activities of daily living is manageable  |                                     |
|  | Little or no physical or cognitive impairment   |                                     |
|  | Person is able to provide self-care for him/her self  |                                     |
| Short Term Goals   | Establish Plan of care and activities to manage side effects of treatment, reduce barriers of care and encourage treatment adherence  |                                     |
|  | Expand knowledge about access to care and prevention resources  |                                     |
|  | Expand knowledge and skills related to HIV transmission and prevention  |                                     |

|  |   |  |
|--|---|--|
| Intermediate Goals   | Maintain or improve state of health   |  |
|  | Continues to use risk reduction principles  |  |
|  | Manage daily living adjustments e.g., vocational, occupational  |  |
|  | Personal Care   |  |
| Long Term Goals  | Self-management of HIV/AIDS' impact on health and activities of daily living  |  |
|  | Maintain independent function and activities of daily living  |  |
|  | Informed/healthy sexual practice in response to unique risk factors (e.g. reinfection)  |  |
|  | Consistent use of safer sex, needle use and exchange practices  |  |
| <i>All services delivered in a culturally and linguistically appropriate manner with culturally appropriate materials.</i>                               |   |  |
| <b>Essential Access Services</b>   |   |  |
| Access to Care   | Information and Referral  | Sexual Health Promotion                  |
|  | Health Insurance  | Outreach*                                |
|  | Case Management*  | Child Care**                             |
|  | Medical Transportation*   | Benefits Counseling                      |
|  | Care Advocacy   | Interpretation/Translation               |
|  | Housing Support Services*   | Discharge Planning                       |
| <b>Essential Services</b>  |   |  |
| Service Needs  | Outpatient/Ambulatory Medical Care*   | Oral Health Care*                        |
|  | Medication Adherence Support*   | Substance Use/Abuse Services*            |
|  | Mental Health*  | Emotional Support                        |
|  | Health Education & Prevention**   | Case Management*                         |
|  | Prevention for Positives**  | Prescription Drug Coverage; e.g. ADAP* * |
| <b>Additional Services</b>   |   |  |
| Additional Services  | Complementary Care  | Vocational Rehabilitation                |
|  | Nutritional Services  | Emergency Financial Assistance**         |
|  | Legal Services**  | Community Awareness                      |
|  | Prevention Training for Care Providers  | Clinical Trials                          |
|  | Support Services for Affected Individuals & Care Givers   |  |
| <b>PLWH/A Progressive Illness</b>  |   |  |
| For people living with HIV/AIDS ongoing assessment of their risk of falling out of care and becoming a member of the unmet need population is essential. |   |  |
| <b>Populations and Outcomes</b>  |   |  |
| Defining Characteristics   | HIV or AIDS diagnosis   |  |
|  | CD4 counts and viral load are problematic, unstable   |  |
|  | Changing care strategy e.g., ART, complementary/alternative therapy, no antiretrovirals, monitoring of CD4 counts and viral loads |  |
|  | Experiences HIV-related or AIDS-defining illnesses & other co-morbid conditions   |  |

|  |  |   |
|--|--|---|
|  | Changing health status may trigger Mental Health* and/or emotional support needs   |   |
|  | Person may be willing to try experimental or extraordinary care measures   |   |
|  | Illness impairs activities of daily living   |   |
| Short Term Goals   | Updated assessment of medical and social services needs  |   |
|  | End-of-life needs assessed and planning started  |   |
|  | Revise and intensify care and prevention interventions   |   |
|  | Resource identification and planning   |   |
|  | Increase use and coordination of medical and social services to improve health and avoid risk of falling out of care; e.g., medical specialties, Benefits Counseling |   |
|  | Development of individualized HIV risk intervention plan   |   |
| Intermediate Goals   | Achieve medical adjustments that stabilize health  |   |
|  | Achieve activities of daily living through adjustments   |   |
|  | Achieve psychological and coping adjustments   |   |
|  | Maintain risk reduction interventions  |   |
| Long Term Goals  | Self-management of HIV/AIDS' impact on health and activities of daily living   |   |
|  | Maintain independent function and activities of daily living   |   |
|  | Informed and healthy sexual practice in response to unique risk factors; e.g. Reinfection  |   |
|  | Consistent use of safer sex, needle use and exchange practices   |   |
| <i>All services delivered in a culturally and linguistically appropriate manner with culturally appropriate materials.</i> |  |   |

### **How RW Funded Care Interacts with Non-RW Funded Care Ensuring Continuity of Care**

**RW Parts A, B, C and F:** There is a clear coordination of Ryan White funding (Part A, Part B, and Part C) that ensures non-duplication. The San Bernardino County DPH Clinical Services Section receives RW Part B funds through the California Office of AIDS as a single allocation and RW Part C funds directly through HRSA. San Bernardino County does not receive any Part A funds for medical or other service and thus does not duplicate any other RW-funded services with Part A. The Riverside County HIV/AIDS Branch receives both Part A and Part B funds. Through rigorous billing and accounting controls, Riverside County HIV/AIDS Branch ensures that Part A funds do not duplicate Part B funds. Part A contractors must identify the primary payer for each client and Part A funds will be only used to pay for uninsured PLWHA or for services not covered by other insurances. Denial of payment by the primary payer must be documented. The Loma Linda University Dental School receives Part F funds, approximately

half of which are used to train dental providers in the TGA. The other half (about \$150,000) is used to serve a small number of PLWHA who receive services through the dental school. The school does not receive Part A funds and therefore the Grantee also expects that these PLWHA are unduplicated.

**Other Medical Insurances including Medi-Cal & Medicare:** As with other payer sources, Part A funds are used as payer of last resort through a rigorous screening process. All RW funded Medical Care Providers are required to be certified Medi-Cal providers to facilitate Medi-Cal billing. Ryan White funded services are provided as a stop gap while eligibility determination is pending for Medicare or other 3<sup>rd</sup> party payer. If a client is found to be eligible for another payer source, RW providers are required to bill that payer source for the cost of services already rendered and report those funds as *Program Income*. This income is used for RW-eligible clients on RW-eligible services.

Currently, the Grantee has been involved in extensive planning for local implementation of the Low Income Health Plan (LIHP), which is part of the 2009 Patient Protection and Affordable Care Act's (PPACA) *Bridge to Healthcare Reform*. LIHP will increase access to Medicaid (Medi-Cal in CA) through the establishment of County-specific healthcare programs targeting low income, childless individuals who do not qualify for Medi-Cal and have no other health insurance. Thus, LIHP will provide a set of services that may overlap with RW Core and Support services. Should this occur, LIHP will act as primary payer and maintain Ryan White as *payer of last resort*. However, because each County will have its own "cap" on how many individuals can be served, it is possible that while an individual is eligible for LIHP services, they may be placed on a *LIHP waiting list* if the "cap" is reached. Therefore this individual would qualify for RW funded services and this would ensure their continued care. It is estimated that 770 PLWHA may qualify for LIHP. Eligibility for LIHP will be determined at the client's next scheduled benefits screening for those clients in compliance with the *DHHS Health Resources and Services Administration (HRSA)* letter (8/9/11) regarding LIHP and RW, and will not result in an interruption in services. LIHP implementation began January 1, 2012.

**Service Coordination:** Both the Grantee and the IEHPC have emphasized the need for ongoing efforts to improve the coordination of services across all RW and non-RW care and prevention service providers. The Grantee included specific language within its 2010 request for proposals for RW Part A and MAI services, which began in FY 2011. As a part of their application for funding, all applicants are required to *establish mechanisms for integration and/or coordination with existing HIV service providers, as appropriate, and participate in an HIV/AIDS community-based continuum of HIV prevention and care*. For FY 2012 services, contracts will be amended with service providers to reflect any changes in the Part A award; at that time, the Grantee will review contract language to ensure that it reflects this requirement for service coordination.

There is more data available on other resources for Core Service categories than for Support Service categories. However, the Grantee uses relevant data from the 2011 CNA to estimate the number of PLWHA who receive services from other Support Service category sources (e.g., Section 8; Home Energy Assistance Program, etc.). This resource gap estimate, which is updated annually, informs the IEHPC's decision-making process during their annual PSRA summit. Thus, when allocating Part A funds, the IEHPC is able to make informed, data driven choices, which have already taken into account other available resources in the TGA, including other available Ryan White funds (i.e., Parts B, C, and F).

**Other Local Coordination:** To further ensure service coordination, Table 18 on the next page depicts the major funding sources (non-Part A) that the Planning Council considers annually in service planning by category. The report on the Availability of Other Public Funding includes a broad array of other available resources that are integrated into the resource gap estimate.

Table 18 - Other Available Funding Considered in Planning for Selected Service Categories

| Service Category              | Type    | Other Funding Sources Considered                 |
|-------------------------------|---------|--|
| Outpatient Medical Care       | Federal | Medicare   |
|                               | Federal | Ryan White Part C                                |
|                               | Federal | Veterans Affairs                                 |
|                               | Federal | Medicaid (i.e., Medi-Cal)                        |
|                               | State   | Medicaid (i.e., Medi-Cal)                        |
|                               | State   | California Children's Services                   |
|                               | State   | Single Allocation (RW Part B pass through State) |
|                               | Local   | Riverside/San Bernardino Counties                |
|                               | Local   | Private Insurance                                |
| Substance Abuse/Mental Health | State   | Single Allocation (RW Part B pass through State) |
| HIV Counseling and Testing    | State   | Single Allocation (CDC pass through State)       |
| Housing Services              | Federal | Section 8  |

|                               | Local   | Private HIV Housing facility (apartment units)   |
| Food Services                 | Federal | Women, Infants, Children (WIC)                   |
|                               | Federal | Supplemental Nutrition Assistance Program (SNAP) |

**How the Service System/Continuum of Care Has Been Affected By State and Local Budget Cuts, as Well as How the RW Program Has Adapted**

**Trends in Services and Fiscal Resources Due to Budget Cuts:** Over the past two years, there has been \$1,655,782 in state and local budget cuts in the TGA (Table 19). The state cuts alone total \$1,279,355 and represent a 38% decline in funding. These cuts have decreased the availability of services within the TGA's continuum of HIV prevention and care services.

Table 19 - Impact of State of California 2009-2010 Budget Cuts on PLWHA and Resources  
Type of Service, Number of Persons Impacted, Resources Lost

| Type of Service                       | Number of Persons Impacted | Resources Lost      |
|---------------------------------------|----------------------------|---------------------|
| State - Prevention Services           | unknown                    | \$ 529,586          |
| State - Early Intervention Services   | 1,087                      |                     |
| State - Case Management Services      | 2,061                      | \$ 259,777          |
| State - Therapeutic Monitoring        | unknown                    | \$ 105,569          |
| State – Medical Care Services Program | 3,320                      | \$ 384,423          |
| Local - Medical Care                  | 325                        | \$ 376,427          |
| <b>Total Reduction</b>                |                            | <b>\$ 1,655,782</b> |

These severe reductions forced the State and both Counties in the TGA to terminate contracts with community based organizations (CBOs) for Medical Care, EIS, and HIV Education and Risk Reduction services. State funds for HIV testing and therapeutic monitoring for viral load, genotypes, and phenotypes were also eliminated. ADAP remains intact. However, if the State continues to have fiscal problems, which are likely, reductions to this program may still occur.

The state fiscal cuts for HIV care services targeting PLWHA (in care and out of care) were predominantly Part B funds. Prior to these cuts, the Part A Grantee also administered Part B funds. Concurrently with the cuts, the California OA made changes in their award process that resulted in local changes in the administration of Part B funds. As a result, Part B funds are no longer coordinated through the Part A Grantee's office but are a single award made to each of the two counties. Each county office responsible for the administration of Part B has authority over the use of these funds. While Part B funds were administered by the Part A Grantee, they supported key support services (e.g., food and medical transportation). These are now included in the TGA's Part A request because Part B funds are no longer available to support them. The Part A Grantee had also used Part B funds to help support Clinical Quality Management (CQM) activities, including the required needs assessment. These resources are no longer available. In 2011, the Part A Grantee negotiated with the Part B counterparts to collaborate and share resources for a coordinated HIV prevention and care *2011 Comprehensive Needs Assessment*.

**For Jurisdictions That Lost A TGA, Describe the Impact on Services (Only Puerto Rico, New York, New Jersey, and California Grantees Should Respond)**

The loss of a TGA in California did not occur in Southern California; therefore, it has no direct impact on HIV services in the Riverside/San Bernardino, CA TGA.

### C. Description of Needs

The TGA completed its 2011 Comprehensive Needs Assessment (CNA), which included an online survey and focus groups targeting PLWHA. Through the survey, the TGA gathered

<sup>1</sup> Public Comments: Any member of the public may address this meeting on items of interest that relate to the Ryan White CARE Act by completing a speaker slip to indicate their interest in addressing the Planning Council. A three-minute limitation will normally apply to each member of the public who wishes to comment, unless waived by the Chair.

<sup>2</sup> The agenda item may consist of a discussion and a vote. Public comments can be made prior to each Planning Council vote.

\* Members must be present at both roll calls to receive credit for meeting attendance.

\*\* Attachment was not available at time of printing, but will be available at the meeting.

Requests for special accommodations (e.g., language translation) must be received 72 hours prior to the date of the meeting. Contact PC Support at (909) 388-0426.

All meetings of the Planning Council and its committees are open to interested parties from the general public. Notices are posted in compliance with the California Brown Act. Information regarding Planning Council meetings, and/or minutes of meetings are public records and are available upon request from the Planning Council Support Staff by calling (909) 388-0426 or by visiting the website <http://www.iehpc.org>.

Servicios en Español: Notificación para servicios de intérprete deben de someterse setenta y dos horas de anticipo. Por favor llame (909) 388-0426.
